Child Pool Safety - Everyone's Responsibility

Katchakid inc. has been providing the ultimate answer in swimming pool safety equipment for over 30 years. That's 3 decades of child pool safety. Pool drownings represent the biggest mortality threat to our small children and anyone's swimming pool is a hazard. As 35% of all child drownings occur in a neighbors, relation or other's pool we all need to take action to safeguard our children by securing our swimming pools.

Pool Safety Nets Original creators and designers of swimming pool safety nets - Katchakid Inc. introduces the Katchakid the original pool safety net. The Katchakid has been developed, tried and tested in 4 continents and is relied upon by parents, schools and communities worldwide. The Katchakid swimming pool safety net - Keeps Children Out Of Danger - Katchakid's unique mesh size has a dual action: small enough to prevent a toddler's head from penetrating the net while simultaneously large enough to discourage movement. Keeps Children off the Pool - Our 4 inch mesh size inhibits movement preventing small children from climbing out onto the net and into danger. Most children will find the Katchakid uncomfortable and abrasive to move on, which will deter any further crawling on the safety net. No Exposed Area of Water - The Katchakid cannot be removed by most children under 12 years of age. If properly positioned, anchored and tensioned the net should not have any perimeter gaps for a child to crawl underneath. Total Visibility - Being able to actually have top to bottom visibility of your pool gives you additional peace of mind. Will Not Shrink - The Katchakid pool netting is treated with laboratory developed maximum UV inhibitors so the netting will not shrink or deteriorate even when subjected to harsh climatic conditions. Convenient - You do not need to remove your pool protection to chlorinate or chemically treat your pool. 24hrs, 7 days a week child pool safety. Easy On and Off - Katchakid's EZ-off Portable Storage Roller constructed from high quality furniture PVC tubing assists with easy wind up removal. Generally takes 3 - 5 minutes to remove and 5 - 8 minutes to replace the net. Aesthetically Pleasing - The Katchakid is available in Pool Ocean Blue or Coal Jet Black Color Coordinated - Choice of adjustable co-coordinating hard-wearing nylon anchors; Cream, Grey or Terracotta (burnt orange). For that exclusive appearance Brass is also available. Katchakid Inc. offers the very best in terms of child pool safety and in our Company History we have never had a reported drowning or near-drowning incident with a correctly installed Katchakid. Why not a solid or mesh swimming pool cover? While all of our pool covers adhere to the A.S.T.M. bureau's pool safety standards we do not recommend a solid swimming pool cover or mesh pool cover to be used as a pool safety device.
