

Pools

Goal: To build a pool with the highest quality materials that will provide endless enjoyment for you and your family. To educate you and provide every choice available on each phase of your pool. Beginning by choosing tile, decking, pool interiors, and equipment, and completing in a timely manner. Our projects on average will be filled with water within four weeks from the date we start to dig. To keep you informed at every stage of construction, and to answer the phone every time you call. And when the pool is completely finished, we will be there for the life of the pool to fix, repair, replace, and answer any problems that might come up.

Experience: We have more knowledge and experience than most in our area. We started out in 1990 as Joe's Pool Service cleaning pools and doing repairs. In 1993 we changed our name to Pool Time, Inc. and have been expanding ever since. Here is a list of services we have done or do now: Solar, Removable Pool Fencing, Bead Blast Tile Cleaning, Safety Covers, New equipment, pool maintenance, Pool Remodeling, and Escrow pool inspections. We are the #1 company the real estate industry uses in northern California when they need an expert pool report, which we do on average of one per day. Our company presently is servicing over 400 accounts of pool maintenance each week. So you can see why we have seen everything out there, and we have been in many backyards to see what is the latest and best. We know what equipment lasts the longest and filters that only have to be cleaned once per year. Pumps that are the quietest, all these things you don't even think of when you purchase a pool. There are over 30 different cleaners on the market and only a few are perfect. Some are so bad for your pool, and are ugly, and not very efficient. All these things leave you at the mercy of the pool contractor. We know exactly what equipment is the best, and the best way a pool should be built for keeping it as clean and as maintenance free as possible. We feel our experience will allow us to build you a pool that you and our company will be proud of!
