

## Salt Chlorinator

Why buy a Salt Chlorinator? My personal opinion is you buy it so your pool is safer because you are able to control how much chlorine you swim in. The second reason is because it is a more natural environment for your body. Your body is 6000 ppm of salt, your pool will be at 3000 ppm. This will feel nice and soft on your body, kind of like a slippery feel. Everyone that has salt loves the way it feels.

Products - IntelliChlor Chlorine Generator

Now, Crystal Clear, Safe Water is Automatic

Electrolytic Chlorine Generation is the easiest, most effective and convenient way to keep pool water sparkling clear. The IntelliChlor chlorine generator uses common table salt to produce all the chlorine your pool needs, right in your pool - safely, effectively, and automatically.

- Same Sanitation performance as manual chlorine addition without the drawbacks
- No need to buy, transport and store expensive chlorine compounds
- No more odor, stinging eyes, irritated skin and bleached out swimsuits

Reliability is Built In

The IntelliChlor chlorine generator is engineered to stand up to the toughest pool conditions and provide years of dependable performance.

- Titanium electrode cell blades are coated with Ruthenium oxide and are rated for more than 10,000 hours of operation - five years of reliable chlorine output under normal operating conditions.
- Control electronics are isolated in the cell, away from high heat components, for longer cell life.
- Totally waterproofed electronics for maximum reliability

Features:

- Three LED Salt Level Indicators
- Two-color Status Displays
- Five Sanitizer Output Levels with Two-button Control

Two Models Available:

IntelliChlor IC 20

IntelliChlor IC 40
