

## Complete Full Service

Cost: Starting at \$120.00 per month

Description: Each week we test your pool water for ph, alkalinity, chlorine, and other important test readings. We then add the appropriate chemicals to balance out your pool water. We then fill out a Service card telling you the time, date, chemical readings, and whatever else we do to your pool that day. The card will be left in your pool timer box. In addition, we take care of all your pool equipment, clean the filter as needed, empty your pump and skimmer baskets and Pool Cleaner bag, and brush your pool steps. We also vacuum your pool bottom and skim the surface clean from debris. All of our trucks are equipped with GPS and we can look up on the internet the exact time your tech started and left your house. We also keep track on the computer the exact day when your filter was cleaned. We are in charge of everything. Just sit back and start enjoying your pool.
